

## ERIH Initial List: History and Philosophy of Science (2007)

European Reference Index for the Humanities (ERIH) is a project jointly sponsored by ESF and the European Commission ERA-Net project "Humanities in the European Research Area" (HERA) (Contract no.: ERAC-CT-2005-0161179). It comes under work-package 7 (Research Infrastructures).

The ERIH lists will help identify excellence in Humanities scholarship and should prove useful for the aggregate benchmarking of national research systems, for example, in determining the international standing of the research activity carried out in a given field in a particular country.

As they stand, the lists are not a bibliometric tool. The ERIH Steering Committee and the Expert Panels therefore advise against using the lists as the only basis for assessment of individual candidates for positions or promotions or of applicants for research grants.

**Expert Panel Scope Note:** History and Philosophy of Science covers the history of scientific disciplines, incl. medical and social science research and technology, as well as philosophical and social studies of science. In Europe, history and philosophy of science is not a well defined discipline in institutional terms. Scholars publish their work in journals not always specifically identifiable as belonging to this field. However, philosophers of science are more likely to publish in general philosophy journals than are historians of science to publish in general history journals.

Journals dealing with the history and philosophy of the social sciences are included, as are journals dealing with the history and philosophy of logic, on the grounds that logic was a key area for philosophy of science.
