

Additional information about Chemistry program

BC program “Chemistry” (language of instruction – English) is an analogy of a joint program of San Diego State University and Tbilisi State University, implemented at TSU since 2015.

The program is developed based on standards and requirements of American Chemical Society (<https://www.acs.org/content/acs/en.html>) and National Center for Education Quality Enhancement of Georgia.

Certification of American Chemical Society (ACS) is underway, which is a highly reputable and one of the oldest professional unions.

Educational program is created with consideration of all theoretical and practical courses that are necessary to obtain relevant qualification. Teaching chemical and biochemical labs are equipped with cutting edge chemical equipment, where students will gain practical skills and experience to work in modern laboratory.

The program also contains diverse general education subjects and is targeted to Georgian and foreign students.
